

Planting Scale

App-Based Input Tracking for
Planters, Drills, Tenders, Spreaders

LIBRA™ PLANT

Designed for planters, drills, seed tenders, and manure/fertilizer spreaders, the Libra Plant hardware connects directly to your implement's load cells and wirelessly communicates with the free Libra Plant app on your iOS or Android device via Bluetooth®, delivering real-time input tracking and management.

Libra Plant automates data collection, enabling you to monitor seed and fertilizer usage, manage inventory levels, and generate detailed reports—helping you reduce waste, improve efficiency, and maximize profitability.

Libra Plant App

Coming Soon to the App Store & Google Play!

LIBRA™
PLANT

Libra Plant Features

Precision Application & Real-Time Monitoring

- Automatically weigh and record inputs applied to each field
- Track real-time seed and fertilizer consumption to prevent over or under-application
- Ensure precise application rates to reduce waste and improve efficiency
- Monitor live tank weights to avoid unnecessary stops
- View live weights from other devices in the Libra Plant app

Inventory Management

- Pre-load purchased seed and fertilizer quantities
- Track inputs from your yard or vendors to the field where they are applied
- Prevent shortages or over-purchasing
- Assign costs to inputs to track expenses (coming soon!)

Reporting and Integration

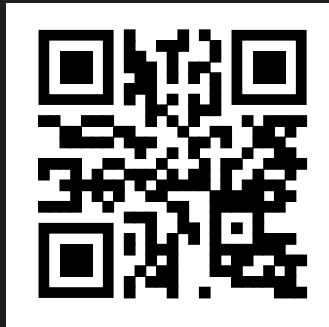

- Compare input data from our Libra Cart grain cart scale to measure input efficiency
- Back up your planting data to the cloud and view it online anywhere, anytime
- Generate detailed reports on load weight, date, time, GPS location*, total inputs and costs per acre (coming soon!)
- Export and share with agronomists, crop advisors, insurance agents
- Integrate with John Deere Operations Center, and CNH (AFS and MyPLM Connect) to import your field data

*if mobile device supports GPS
